The first section of the book covers an overview of various relevant topics including: doctor-patient partnerships, the ABCs,

the concept of progressive practical application, and a new paradigm to challenge how you approach dealing with healthcare issues. The subsequent sections address the areas of stress reduction, environmental estrogen/toxin exposure, prescription estrogens, and nutrition. Each section contains background material and current medical findings. Because the ultimate goal of the program is to have you to make appropriate steps to health, each section ends with a practical application.
