George Orwell's famous satire of the Soviet Union, in which "all animals are equal but some animals are more equal than others." Reading Scripture is a spiritual practice at the very heart of the Christian faith. But how is it possible to encounter God in reading the words of the Bible? Does reading the Christian Bible require a different approach from how one may read other texts or writings? What is required of the spiritual reader to read well? Seeking to answer such questions, Angela Lou Harvey provides a theological exploration of the idea of "spiritual reading" in the context of the Western church today. Drawing upon insights of theologians such as Karl Barth, Henri de Lubac, and Ellen F. Davis, the author suggests that the particulars of Christian belief profoundly shape the distinctive practice of the spiritual reading of the Bible. A plane crashes on a desert island and the only survivors, a group of schoolboys, assemble on the beach and wait to be rescued. This book is essential reading for professors and students of education, teachers and students of AP courses, parents, administrators, and state and federal agencies vested in the AP programme. Reading is a highly complex skill that is prerequisite to success in many societies in which a great deal of information is communicated in written form. Since the 1970s, much has been learned about the reading process from research by cognitive psychologists. This book summarizes that important work and puts it into a coherent framework. The book's central theme is how readers go about extracting information from the printed page and comprehending the text. Like its predecessor, this thoroughly updated 2nd Edition encompasses all aspects of the psychology of reading with chapters on writing systems, word recognition, the work of the eyes during reading, inner speech, sentence processing, discourse processing, learning to read, dyslexia, individual differences and speed reading. *Psychology of Reading, 2nd Edition*, is essential reading for undergraduates, graduates, and researchers in cognitive psychology and could be used as a core textbook on courses on the psychology of reading and related topics. In addition, the clear writing style makes the book accessible to people without a background in psychology but who have a personal or professional interest in the process of reading.

Now with an introduction by Joseph Bruchac. Personal interactions are the single most effective way for teachers to understand and evaluate their student as learners. Responding specifically to new Common Core State Standards in reading and writing, this book introduces pre- and inservice teachers to a method of one-on-one interaction the authors refer to as the "stretch conference." This book provides detailed practical advice on the logistics of implementing these conferences during the busy school day, including tips on how and when to schedule conferences and how to successfully manage the classroom during conference time. The authors argue that, rather than using valuable conference time for word-level concerns and editing, teachers should focus on more ambitious goals that will deepen (or "stretch") students' skills in comprehension and writing. This resource suggests where conferences fit in with other important pieces of literacy instruction; introduces a variety of high-quality cues to use during conferences; and shows how conferences can function as formative assessment for reading and writing skills.

Book Features: Written by two veteran teacher educators who conduct frequent workshops and professional development with teachers. Helps teachers adjust their instruction for the demands of Common Core Standards, specifically Reading Anchor Standards 1 and 10, and Writing Standards 1-5 and 10. Shows teachers how to schedule individual conferences within typical classroom time constraints. Includes many detailed examples of effective conferences taken from real classrooms. "A roadmap for engaging students in conversations that will change their understanding. Frankly, it's an amazing resource and one that has changed my thinking about classroom instructional time." —From the Foreword by Douglas Fisher, San Diego State University "A critical opportunity to reflect on our practice, examining whether the content of our conferences is aligned with the rigorous expectations of the Common Core." —Sunday Cummins, literacy consultant and author

Reading and textual interpretation are ordinary human activities, performed inside as well as outside academia, but precisely how they function as unique sources of knowledge is not well understood. In this book, René van Woudenberg explores the nature of reading and how it is distinct from perception and (attending to) testimony, which are two widely acknowledged knowledge sources. After distinguishing seven accounts of interpretation, van Woudenberg discusses the question of whether all reading inevitably involves interpretation, and shows that although reading and interpretation often go together, they are distinct activities. He goes on to argue that both reading and interpretation can be paths to realistically conceived truth, and explains the conditions under which we are justified in believing that they do indeed lead us to the truth. Along the way, he offers clear and novel analyses of reading, meaning, interpretation, and interpretative knowledge. The Iron Man came to the top of the cliff. Where had he come from? Nobody knows.
