Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: "why are all the great building toys made for boys?" Often, the moment they are voiced, they have the paradoxical effect of being utterly

surprising yet instantly obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear—but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. THE NO.1 SUNDAY TIMES BESTSELLER 'A beautiful little book by a brilliant mind' DAILY TELEGRAPH 'Effortlessly instructive, absorbing, up to the minute and - where it matters - witty' GUARDIAN The world-famous cosmologist and #1 bestselling author of A Brief History of Time leaves us with his final thoughts on the universe's biggest questions in this brilliant posthumous work. Is there a God? How did it all begin? Can we predict the future? What is inside a black hole? Is there other intelligent life in the universe? Will artificial intelligence outsmart us? How do we shape the future? Will we survive on Earth? Should we colonise space? Is time travel possible? Throughout his extraordinary career, Stephen Hawking expanded our understanding of the universe and unravelled

some of its greatest mysteries. But even as his theoretical work on black holes, imaginary time and multiple histories took his mind to the furthest reaches of space, Hawking always believed that science could also be used to fix the problems on our planet. And now, as we face potentially catastrophic changes here on Earth - from climate change to dwindling natural resources to the threat of artificial super-intelligence - Stephen Hawking turns his attention to the most urgent issues for humankind. Wide-ranging, intellectually stimulating, passionately argued, and infused with his characteristic humour, Brief Answers to the Big Questions, the final book from one of the greatest minds in history, is a personal view on the challenges we face as a human race, and where we, as a planet, are heading next. This little book can have a big impact on your life! Whether your faith in God is new or you've known Him for a long time, you may have questions about who He is and what He wants for your life. God's Little Book of Answers to Big Questions provides a quick and easy way to find answers to 150 big and challenging questions that believers and unbelievers alike want to ask - such as "Why does God allow suffering?" Every question comes with an answer from the

Bible, a short devotional reading to add context, and a promise from God. The book can be used as a devotional or reference guide, or as a resource to help others who have questions about how faith in God works out practically in our lives. The questions we ask ourselves determine our lives. Our thoughts are nothing more than a continuous question-and-answer session we have with ourselves. Our lives - material, emotional, spiritual, and financial - are a direct reflection of our thoughts. Eighty-five percent of these thoughts are both habitual and unconscious. Meaning, we are asking and answering the exact same questions every day, usually in the same way over and over again. What all this means: If there is any area of your life you're not 100% happy with, the root of the needed change is in the questions you're asking of yourself. And since these questions are habitual and unconscious, the first order of business is to become aware of the questions. Only then can we change them. That is exactly what we're doing with this book, Ask Yourself A Better Question. The improved quality of your questions will lead to an improved quality of life. No matter how much skill and how many resources you add to your arsenal, bad questions will always drag you backwards into failure. Not taking full control of your questions will lead you into the randomness of the world - good days and outcomes followed by just as many bad days and outcomes. If this has happened to you

before, there isn't anything wrong with you: You just didn't know what you didn't know. No one ever told you about this. There aren't any classes in school teaching you the habit of asking strong, empowering questions. Some people live 80 years and never consider what they've been asking themselves all day every day, thus they think success in life is based on randomness, the luck of the draw. Success and happiness are not random. You become exactly what you ask yourself. Are you ready to ask yourself better questions and improve your life, one answer at a time? You better be, because the journey begins on the next page. Let's get started. Many children are fascinated by animals and this engaging flap book will answer lots of their questions. It features entertaining and informative illustrations and over 50 flaps to lift and look beneath. Most people decide whether a second date is on the cards in under an hour. Feeling the pressure?
