This study seeks to contribute to a better understanding of how syntactic variation is affected by probabilistic factors in English as a foreign language (EFL, L2), exemplified by the effect of weight on the syntactic variation with English transitive verb-

particle constructions (e.g. look up, sort out) and transitive verb-prepositional phrase (PP) constructions (e.g. take into account, bear in mind). With these constructions, the particle/PP may occur either adjacent to the verb or separated from the verb by a direct object noun phrase (DO NP). Being highly influenced by the weight of the DO NP in native (L1) English, little is known about the factors, including syntactic weight, that govern this variation in L2 English. Against the background of possible native-language transfer, this study examines whether advanced L1-German EFL learners are sensitive to the probabilistic effect of weight on syntactic choices with verb-particle/PP constructions and whether there are differences when compared to English native speakers. Triangulating comparative corpus data and experimental data, i.e. elicited production and elicited assessment, the study provides converging evidence from language production and intuition that the learners have acquired a near-native awareness of weight effects in verb-particle/PP constructions, with differences indicating a tendency to more conservative choices. No matter how good your research and study skills, the ultimate test for the law student is the exam. This book explains how to tackle successfully the sort of problems and essay questions typically found in exam papers. The authors clearly guide students through the process of planning and structuring answers, providing advice on what to include, and on what to leave out. The book contains 50 questions and model answers divided into chapters covering all major topics. Each chapter begins with an introduction focusing on important points and ends with suggestions for further reading. Each question is supported by clear commentary indicating exactly what examiners are looking for, followed by an answer plan listing the key points to cover. Online Resource Center An Online Resource Center accompanies the book, providing revision and exam advice, links to useful websites, and a glossary to develop students' understanding of subject-specific terms. This primer for teachers (prospective and practicing) asks readers to question the historical present and their relation to it, and in so doing, to construct their own understandings of what it means to teach, to study, to become "educated" in the present moment. Curriculum theory is the scholarly effort - inspired by theory in the humanities, arts and interpretive social sciences - to understand the curriculum, defined here as "complicated conversation." Rather than the formulation of objectives to be evaluated by (especially standardized) tests, curriculum is communication informed by academic knowledge, and it is characterized by educational experience. Pinar recasts school reform as school deform in which educational institutions devolve into cram schools preparing for standardized exams, and traces the history of this catastrophe starting in 1950s. Changes in the Second Edition: Introduces Pinar's formulation of allegories-of-the-present - a concept in which subjectivity, history, and society become articulated through the teacher's participation in the complicated conversation that is the curriculum; features a new chapter on Weimar Germany (as an allegory of the present); includes new chapters on the future, and on the promises and risks of technology. Includes subject review, practice quizzes, test-taking strategies, and four full-length sample tests with

answers and explanations. These past examination papers for the PET for Schools exam, aimed at a younger audience, provide the most authentic exam preparation available. They allow candidates to familiarise themselves with the content and format of the examination and to practise useful examination techniques. A Student's Book with answers and a Self-study Pack are also available. Books are numbered to indicate how many are available. Numbers do not refer to levels. Offers information on test-taking strategies, sample questions and answers, and two full-length practice tests. Team of Experienced and specialist professionals to design and offer best quality Competitive material for Healthcare professional to excel in Competitive exams and also increase the Patient Safety standards in the country Adaptive E-learning was proposed to be suitable for students with unique profiles, particular interests, and from different domains of knowledge, so profiles may consider specific goals of the students, as well as different preferences, knowledge level, learning style, rendering psychological profile, and more. Another approach to be taken into account today is the self-directed learning. Unlike the adaptive E-learning, the Self-directed learning is related to independence or autonomy in learning; it is a logical link for readiness for E-learning, where students pace their classes according to their own needs. This book provides information on the On-Job Training and Interactive Teaching for E-learning and is divided into four sections. The first section covers motivations to be considered for E-learning while the second section presents challenges concerning E-learning in areas like Engineering, Medical education and Biological Studies. New approaches to E-learning are introduced in the third section, and the last section describes the implementation of E-learning Environments.

The second edition of the Handbook of Test Development provides graduate students and professionals with an up-to-date, research-oriented guide to the latest developments in the field. Including thirty-two chapters by well-known scholars and practitioners, it is divided into five sections, covering the foundations of test development, content definition, item development, test design and form assembly, and the processes of test administration, documentation, and evaluation. Keenly aware of developments in the field since the publication of the first edition, including changes in technology, the evolution of psychometric theory, and the increased demands for effective tests via educational policy, the editors of this edition include new chapters on assessing noncognitive skills, measuring growth and learning progressions, automated item generation and test assembly, and computerized scoring of constructed responses. The volume also includes expanded coverage of performance testing, validity, fairness, and numerous other topics. Edited by Suzanne Lane, Mark R. Raymond, and Thomas M. Haladyna, The Handbook of Test Development, 2nd edition, is based on the revised Standards for Educational and Psychological Testing, and is appropriate for graduate courses and seminars that deal with test development and usage, professional testing services and credentialing agencies, state and local boards of education, and academic libraries serving these groups. Forsythe, M.D., H.M.D., has praised Diana Warren for courage and tenacity in her arduous battle against Stage II breast cancer. Doctor Forsythe insists that "Diana deserves kudos from people around the world, for refusing to subject her body to unnecessary standard chemo and radiation that unscrupulous allopathic oncologists kept trying to require her to endure." Featured in many hot-selling books written by others including media personality Suzanne Somers, and also the author of many successful books himself, Doctor Forsythe has hailed Diana for her dogged determination amid a non-stop quest to find effective natural, non-toxic treatments as her health deteriorated, while also hunting for an experienced doctor licensed to avoid high-dose poisonous options. "I strongly recommend that everyone who suffers from cancer read Diana's compelling tale," Doctor Forsythe said. "Today, Diana is playing a formidable role in helping to lead the way as a true champion in a quest to inform the public of the urgent need to avoid toxic treatments when feasible in certain circumstances, and how to find acceptable natural remedies-plus the importance of avoiding 'standard-of-care' chemo and radiation when under the care and guidance of a qualified, licensed medical professional." After reading many hundreds of books on cancer, Doctor Forsythe hails Diana's publication as being "by far among the best from the viewpoint of a person who never attended medical school. Readers undoubtedly will benefit when learning of the exceptional example Diana has set for us all." The rapid growth of diversity within U.S. schooling and the heightened attention to the lack of equity in student achievement, school completion, and postsecondary attendance has made equity and diversity two of the principle issues in education, educational leadership, and educational leadership research. The Handbook of Research on Educational Leadership for Equity and Diversity is the first research-based handbook that comprehensively addresses the broad diversity in U.S. schools by race, ethnicity, culture, language, gender, disability, sexual identity, and class. The Handbook both highly values the critically important strengths and assets that diversity brings to the United States and its schools, yet at the same time candidly critiques the destructive deficit thinking, biases, and prejudices that undermine school success for many groups of students. Well-known chapter authors explore diversity and related inequities in schools and the achievement problems these issues present to school leaders. Each chapter reviews theoretical and empirical evidence of these inequities and provides research-based recommendations for practice and for future research. Celebrating the broad diversity in U.S. schools, the Handbook of Research on Educational Leadership for Equity and Diversity critiques the inequities connected to that diversity, and provides evidence-based practices to promote student success for all children. In Deserving Citizenship Ricky van Oers analyses the reasons for introduction and effects of citizenship tests in Germany, the Netherlands and the United Kingdom.
